Notes to Consolidated Financial Statements
(Expressed in thousands of U.S. dollars)

(Six months ended March 31, 2002)

## Notes to Financial Statements

## 1. Nature of operations

Electrovaya Inc. is an early stage manufacturer and marketer of advanced, high energy, rechargeable batteries based on its patented lithium ion SuperPolymer ${ }^{\text {TM }}$ technology. During the period the Company increased its production and sales and expects to continue to develop its product lines and explore other potential applications using the developed technology.

The Company has no distinct operating segments and has no operating assets located outside of Canada. The Company has not experienced any seasonal variation in revenue as it has just commenced production and sales in the last fiscal year.

The Company prepares its financial statements in accordance with accounting principles generally accepted in Canada. These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries.

## 2. Significant accounting policies

The disclosures contained in these unaudited interim consolidated financial statements do not include all requirements of generally accepted accounting principles (GAAP) for annual financial statements. The unaudited interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended September 30, 2001.

The unaudited interim consolidated financial statements are based upon accounting principles consistent with those used and described in the annual consolidated financial statements, except for the following:
(i) In the first quarter of fiscal 2002, the Company adopted retroactively the new Canadian Institute of Chartered Accountants (CICA) Handbook Section 3500 "Earnings per share," which requires the use of the treasury stock method for calculating diluted earnings per share. Under this method, Electrovaya's basic loss per share is unaffected and its common share purchase options are anti-dilutive.
(ii) In April 2001, the Company commenced production of commercial units at its new manufacturing facility in Mississauga. All of the materials, labour and overhead costs associated with the production of commercial units are included in Cost of goods sold. As production had not yet commenced in the Mississauga facility in the second quarter of 2001, there is no comparable amount for that period.
